Annals of Pure and Applied Logic 38 (1988) 307
North-Holland

AUTHOR INDEX

Volume 38 (1988)

BLASS, A., Selective ultrafilters and homogeneity (3) 215–255
DEHORNOY, P., Π^1_1-complete families of elementary sequences (3) 257–287
GORDEEV, L., Proof-theoretical analysis: weak systems of functions and classes (1) 1–121
KANDA, A., Recursion theorems and effective domains (3) 289–300
LUBARSKY, R.S., Another extension of Van de Wiele's theorem (3) 301–306
NELSON, E., The syntax of nonstandard analysis (2) 123–134
SCHMERL, U.R., Diophantine equations in fragments of arithmetic (2) 135–170
SHELAH, S., A graph which embeds all small graphs on any large set of vertices (2) 171–183
SROUR, M., The notion of independence in categories of algebraic structures, Part I: Basic properties (2) 185–213
